

Printing

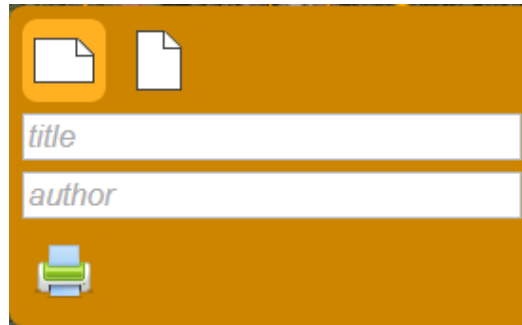

**Hint: Printing may take longer depending on how far out the map is zoomed or how detailed the data is in the map. For best results, zoom in or reduce the amount of layers displayed.*

- From the Basic Search application:

1. Click the Printer Icon on the top left.

2. Choose the layout (landscape or portrait), name the map, and click the icon again.

A screenshot of a print dialog box with an orange background. It features two document icons at the top left, a text input field labeled 'title', another labeled 'author', and a printer icon at the bottom left.

3. The printer will turn gray and a page will appear to be printing on the icon.

4. The printer will turn green when finished.

5. Click the page next to the printer to retrieve your map for printing.

6. From there, you can either print or save the map.

- From the Custom Map Builder:

1. Click Print.  A new window will open. It may take some time to generate your map.

2. Right-click to print map from Chrome or Internet Explorer.

- From the Enhanced Search application:

1. Click the box if you want to also include a Legend with the map.

2. Choose a print option from the dropdown.

3. Then click the Print button again.

4. Once the "Printing" message changes to "Printout," click on it

Add legend to output

to retrieve the map.

5. Use the browser options to send the map to the printer. (For example, right-click on the map in Chrome and choose Print.)
